LS-CAT Confidential Minutes – December 20th, 2017

LS-CAT Management Board Meeting Minutes

Date:	20th, December 2017, 11:00 AM (CDT)
Location:	Crown Conference Room, West Tower Rebecca Crown Center Northwestern University 633 Clark Street, Evanston, IL 60208
Board Members (In Attendance)	Amy Rosenzweig (NU) Alfonso Mondragon (NU) Bernie Santasiero (UIC)
Board Members (Via Telephone)	John Tesmer (UM) – Board Chair James Geiger (MSU) Karsten Melcher (VARI) Katrina Forest (UW) Satish Nair (UIUC) Ladislau Kovari (WSU)
LS-CAT Staff (NU)	Keith Brister – Operations Manager Spencer Anderson Michael Bolbat Joseph Brunzelle Monica Green Elena Kondrashkina Jay VonOsinski Zdzislaw Wawrzak
Other from NU	Jay Walsh
Guest Speaker	Stephen Streiffer (Assoc. Lab Director, APS)

Open Meeting (John Tesmer)

John Tesmer calls meeting to order at 11:30 AM.

LS-CAT Management Board Meeting Agenda (Keith Brister)

John Tesmer calls to approve current agenda and minutes from May 2017 Board Meeting. Alfonso Mondragon moves and Katrina Forest seconds the motion.

Introduction of participants.

Advanced Photon Source (Stephen Streiffer)

APS Safety

1. APS suspended operations in July 2017 due to 2 electrical safety incidents
    a. Electrical engineers were shocked while testing capacitors on a pulse magnet
    b. Student user received a shock from a detector battery while troubleshooting an experiment
2. Qualified electrical workers and floor coordinators performed detailed inspections of all beamlines and operations
3. ESAFs were found to be very accurate
4. Beamline set up and commissioning needed improvement
5. OSHA investigated Argonne and UChicago LLC is experiencing financial penalties due to these events
6. More formal inspection and ESAF approval process was instated
7. Improving electrical inspection process at beamlines
8. Moving toward having designated electrical inspection at each beamline
9. Opened some maintenance days to compensate for lost beamtime

APS User Trends

1. Number of users in FY17 topped 5,700
2. Stable macromolecular crystallography community
3. Beamtime availability only knocked down to 97% despite shutdown from the electrical incidents
4. Aging beamline systems to be taken into consideration
5. Operations funding has done pretty well despite political obstacles in past fiscal years
6. President's budget cut could pose problems for operations

APS Upgrade

1. Preliminary design report completed in FY17
2. Hardware on order for the upgrade
3. Strong vote of confidence from DOE in favor of the upgrade

4. With Congress' budget shutdown would start mid 2022
5. President's budget would delay if for about a year
6. Completion of project (CD-4) proposed somewhere around FY24-FY25
7. Rebuilding of beamline proposed to take 1 year
8. Emittance expected to be 42 picometres after upgrade and commissioning
9. 30% improvement with reverse bend lattice
10. Hybrid bunch mode no longer with possible with new lattice
11. Beam will be topping up faster with the new machine
12. Consideration between using round beam vs flat beam
13. Desired start up with 25mA mode, 81 bunches and flat beam
14. Better brightness, comparable flux in beamline

APS Partnerships models

1. Current partnership model - 75% of beamtime goes toward BAC/25% to general user program
2. New BES partnership model – 50% to BAC/50% to general users
3. New model is problematic for members
4. New partnership model expected to take place somewhere around FY26

Discussion regarding how to compensate for loss of member beam time with new partnership model.

Discussion regarding issues with access to APS by international students.

LS-CAT Status (Keith Brister)

FY2019 Budget Forecast

1. 3% salary increases expected for FY2019
2. FY18 budget going as planned except for purchase of service contract for Eiger detector
3. We do not foresee any unusual expenses for FY2019

Nomination for LS-CAT Board Chair

Katrina Forest nominates Jeanne Stuckey as new Board Chair. Would serve for a suggested 2-year term. Board voted and all in favor of Jeanne Stuckey as new board chair for a renewable 2-year term.

Usage and Publications at LS-CAT

1. Primary publications listed in PDB account for 90% of our publications
2. General users put out the highest number, UM second

3. LS-CAT doing very good job servicing the general user program

Eiger 9M Issues

1. Issue with misplaced heating pad corrupting data images
2. Replacing cables has appeared to fix the issue

Staffing Changes at LS-CAT

1. Loss in 2 FTE staff members at LS-CAT
2. M. Bolbat and J. VonOsinski have taken over robot maintenance
3. Monica Green has taken over administrative duties

Upgrade Planning

1. Making selections for undulators in January 2018
2. Will choose a 3.0 cm device for the D line
3. "Wish list" of items needed for the Upgrade (slide 10)

Tesmer adjourned meeting at 1:00pm.

Minutes respectfully submitted by Monica Green
